A NUMISMATIC LIFE

My career as a numismatist had an unlikely beginning in an atypical setting. One day, at the age of 13, while living with my folks in Grand Rapids, Michigan, I visited an elderly widower. He had a box of old coins and eagerly sat with me relating their stories. On that day I bought my first ancient coin, a bronze of Augustus, and paid less than a dollar for it. To put things into perspective, at that time bus rides were a nickel. With that coin of Augustus I was hooked, found a Grand Rapids coin club and joined immediately.

Fast forward through marriage and fatherhood, which left neither time nor money for academic pursuits. Still, though I couldn't afford the best, I continued buying coins – mostly ancient and a few foreign. I returned to college later in life with two children to support, not much money and lots of coins. To support ourselves, another student and I opened a stamp (his specialty) and coin shop. It was my good fortune to be the only person in a 100 mile radius to be offering ancient and foreign coins. I also started buying books on the field and left Indiana University with more books on ancient coins than on biochemistry, which was my specialty.

Because of my expertise in bio-lab work (and the fact that they had a newly acquired, very expensive electron microscope no one on staff knew how to use) Cornell Medical College brought me to New York, where I did medical research until the mid 1970s when the projects' grants ran out. Cornell then hired me into hospital administration, which did not suit the scientist in me and I left.

When I first moved to New York I'd met Aaron Feldman. We became friends and I followed, almost religiously, his axiom, "Buy the Book before the Coin". Thus, all during my hospital stint, I'd been building bookshelves in my railroad flat apartment and adding to my library. The sources, mostly European and American auctions and dealers, were international. In this period I began utilizing (and purchasing from) the fine catalogues and auctions of George Frederick Kolbe.

I now had the library (thanks, Aaron), a few coins and a great interest in antiquities so began buying and selling both. Thus I followed the adage that one should find something one loves and figure out how to make a living from it. I was then officially in the ancient coin and antiquities business. Timing was perfect. The business was flourishing.

Since I had the genesis of a good library, I started cataloging for other clients then decided to hold my own auctions. It never occurred to me to hire an auctioneer (probably a throw-back to the off-Broadway acting I did while at the hospital) so I obtained an auctioneer's license. As an aside, that license opened another aspect of my career as I was later hired as auctioneer for several American and European firms. Calling auctions in three languages in Switzerland was quite the challenge.

Under my own name I issued 12 auction catalogues of ancient coins, one of antiquities and dozens of fixed price lists using my now well-formed reference library (which titles you hold in your hands) built over several decades. The "fun" stuff was that I photographed all the coins, developed and printed the film in that self-same railroad flat in NYC, wrote, typed, pasted down the text, and shipped the catalogues myself.

The library was also used to research several journal articles, prepare numerous appraisals for a variety of private and corporate entities and to corroborate testimony when I was, on occasion, called by the IRS as expert witness.

It's been a fascinating journey, being able to do something interesting and challenging, being independent and supporting myself while doing so.

But the time has come to offer the library to others. For 13 years I've enjoyed sailing a classic 31 foot yawl. For health reasons I am forced to put that part of my life behind me as well.

I still have files full of nearly-completed articles and a nascent book, based on my collection of European bronze medals. The library has served me well. The research is done. Now a new chapter begins.

A significant work. Jean-Foy Vaillant (1632–1706) was one of the most important numismatists of the 17th century. *Numismata imperatorum* was an outstanding achievement, and was very popular in its day, going through many editions. Significantly, Vaillant cited a source for each coin he included in his enumeration, thus avoiding the trap so commonly encountered at the time of listing apocryphal coins. These citations provide us with information on the holdings of some of the most prominent coin cabinets of the 17th century. Regarding the missing *Nummorum appendix*, Dekesel notes in his bibliography of Vaillant's works published in the Summer 2004 issue of *The Asylum* that "some copies of this book do not contain the quires h, i & k and have no chainword 'NUM' on g2v", which means that they were issued as such." Brunet V.1027 (29821). Dekesel (2004) F19. Lipsius 409. Strandberg 69.

One of the truly great scholarly numismatic periodicals, certainly the most important ever published in the English language. Within a six year period, *Revue numismatique*, the *Numismatic Chronicle* and *Revue belge de numismatique* began publication, and today all three remain indispensable storerooms of information on ancient coins, medieval and modern numismatics (especially relating to their respective countries of publication), and on a wide variety of other numismatic topics. Several early volumes included photographic plates; beginning in 1889, virtually all coin illustrations were reproduced on auto-type plates, which allow for enlargement of detail under magnification. This innovation, combined with the prolific output of the superb ensemble of numismatists centered around the British Museum, produced a body of numismatic research that today remains of inestimable utility. Complete sets of the *Chronicle* are rarely offered. The first series is seldom available, and many volumes in the first half of the twentieth century, particularly those issued during and surrounding the World Wars remain elusive. Clain-Stefanelli 776. Grierson 19.

39 THE NUMISMATIC CHRONICLE. London: The Numismatic Society/The Royal Numismatic Society. Assorted issues, one complete volume: 1892 (Third Series, Vol. 12), Nos. 2-4; 1907 (Fourth Series, Vol. 7), complete; 1913 (Fourth Series, Vol. 13), Nos. 1, 3 and 4; 1926 (Fifth Series, Vol. 6), No. 4; 1938 (Fifth Series, Vol. 18), Nos. 3-4; 1939 (Fifth Series, Vol. 19), Nos. 1, 3 and 4; and 1941 (Sixth Series, Vol. 1), Nos. 1-2. Condition varies, poor to fine, with most in the very good range. (50.00)

40 THE NUMISMATIC CHRONICLE. Thirteen articles removed from the *Numismatic Chronicle*, 1885-99. Contents include: Hermann Weber's 1893 "On Some Unpublished or Rare Greek Coins" (2 plates); Weber's 1896 "On Some Unpublished or Rare Greek Coins: Second Contribution" (3 plates); G.F. Hill's 1896 "Portrait of Perseus of Macedon" (1 plate); Weber's 1899 "On Finds of Archaic Greek Coins in Lower Egypt" (2 plates); George MacDonald's 1899 "The Amphora Letters on Coins of Athens"; E.J. An unrelated plate from another article is also bound in. 8vo, contemporary green half calf, lettered in gilt. Binding a bit rubbed, but sound. Contents written on endpapers in ink. Very good or better. (100.00)

Sage Theological Seminary Library, with minor spine notations and ex libris labels to pastedowns. Generally a very good set, with somewhat worn but sound bindings and crisp, nice paper. (1250.00)

Eckhel's magnum opus; one of the major foundation works of modern scholarly numismatics. Joseph Hilarius Eckhel (1737-98) has been justly regarded as the "father of ancient numismatics" and his *Doctrina* as the major exposition of

his principles. "With him began a new era in the study of ancient numismatics, rigid scientific methods entered the field of research supplementing the usual approach of the amateur. For the first time in its history the basic elements of ancient Greek and Roman numismatics – metals, ponderal systems, organization of mints, significance of coin-types, coins in their relation to the history of art – are amply discussed"—Clain-Stefanelli, *Numismatics*, page 29. This second edition is bibliographically complex. Clain-Stefanelli 1643*. Lipsia 110.

- 116 Humphreys, Henry Noel. ANCIENT COINS AND MEDALS: AN HISTORICAL SKETCH OF THE ORIGIN AND PROGRESS OF COINING MONEY IN GREECE AND HER COLONIES; ITS PROGRESS WITH THE EXTENSION OF THE ROMAN EMPIRE; AND ITS DEVELOPMENT WITH THE FALL OF THAT POWER. ILLUSTRATED BY NUMEROUS FAC SIMILE EXAMPLES IN ACTUAL RELIEF, AND IN THE METALS OF THEIR RESPECTIVE COINS. First edition. London: Grant and Griffith 1850. 8vo, contemporary vellum binding with red morocco spine label, gilt; marbled endpapers, (4), iv, 208, (2) pages; errata slip tipped in; occasional text illustrations; 10 remarkable embossed plates comprising gold, silver and copper or bronze foil coin facsimiles in full relief each with a facing leaf of descriptive text. Vellum browned and buckled. Text a bit toxed, as always. Some oxidation to the coin plates, as frequently seen. Overall, still a very good example. (50.00)

A lavish production of the time. The plates have the appearance of actual ancient coins in high relief embedded in cardboards; one holder. Humphreys (1810-97), was an artist and book illustrator of note, advanced especially for his narrative works of fiction. His work, as in numismatics and ethnology, emerged in several monographic Victoria productions, of which this work at hand is the most remarkable. Unfortunately the book is published with poorish binding, leaving many surviving examples in fair worse shape than this. Another problem with this work is the inaccuracy of the text, not in the coin facsimiles and the descriptive leaves of text facing them. Over the years many of the facsimiles, particularly the more delicate ones, have become detached and often disintegrating. Sometimes the small slips also become detached and lost. Still a remarkable work.

Sixteen volumes complete. 12mo, contemporary bindings: main seven volumes in full tan calf, spines decorated in gilt with two gilt-lettered spine labels, all edges marbled, board edges decorated in gilt; Supplément volumes in attractive tan half calf, gilt, with marbled boards, spines decorated and lettered in gilt, marbled endpapers. Main volumes very good with bindings somewhat worn; Supplément volumes mostly near fine, though with one volume with a detached (but present) board. Overall a very good to near fine set. (1500.00)

Ex Baron Northwick, with his armorial ex libris label in each volume. The rare original edition of this monumental work, still consulted. "A remarkable figure in numismatics at the turn of the century was the Frenchman Théodore-Edme Mionnet (1770-1842), who joined the Cabinet des Médailles in 1795. Strongly influenced by the classical tendencies of his age, he pursued ideals of disseminating knowledge of ancient coins among wider circles ... he published descriptions of the type, history and rarity... Eventually the publications grew into a considerable work. *Description des médailles antiques grecques et romaines avec leur degré de rareté et leur estimation*, published between 1806 and 1813 in six volumes with an additional volume of plates. The Supplément, in nine volumes, was issued between 1819 and 1837. In this largest publication (up to that time) on Greek coins, Mionnet succeeded in describing over 52,000 pieces. Although the work is not flawless and its scholarly standards are lowered by a continuous preoccupation with establishing the commercial value of coins, it still remains, through its wealth of information, an invaluable reference." — Elvira Eliza Clain-Stefanelli, *Numismatics—An Ancient Science*. Best described in Clain-Stefanelli's *Numismatics – An Ancient Science* (pages 42-43): "Imhoof-Blumer's name trails like a comet across the field of Greek numismatics.... Inspired by Theodor Mommsen's idea of creating an extensive work on Greek coins as a companion to the *'Corpus of Latin Inscriptions*, the Prussian Academy of Sciences in Berlin assigned Imhoof-Blumer the direction of *Die Antiken Münzen Nord-Griechenlands*. Such a corpus was intended to supersede all publications on the subject by describing every known coin type of each city or province within a chronological sequence, with full attention given to all available source material. This dream of a corpus of all ancient Greek coins seems to have haunted numismatists since the early 16th century, when Wolfgang Lazius first proposed such a work. But it proved too ambitious even for the late 1800s, and despite competent scholars, this gigantic German work progressed very slowly until it finally came to a halt in the late 1930s." The rare unnumbered final volume edited by Hans von Fritze is not present. Clain-Stefanelli 1806*, 2305*, 2368*, 2417* and 2418*.

 Ex Henry Schroder Robinson, with his bookplate in each volume. Carl Ludwig Müller's life (1809–91) spans the nineteenth century. The foremost Danish numismatist of his time, Müller catalogued, for the first time, many of the ancient coins in the Royal Coin Cabinet at Copenhagen. He wrote four major works on ancient Greek coins, all of which are still consulted, and the monumental work at hand won for him the numismatic prize of the French Academy. Though the plates have been reprinted various times, the original work, with the extensive text volume in French, rarely comes to market. Clain-Stefanelli 2341*.

[not listed in Manvilles *Numismatic Guide to British and Irish Printed Books 1600–2004*] nor in Clain-Stefanelli, nor in the ANS Library catalogue. This is a collected edition of six substantial monographs published under the aegis of the International Numismata Orientalia; collected together with a new introduction by general editor Edward Thomas, who intended it to be a supplementary volume of Madsen's *Numismata Orientalia*. The monographs included are: 'An 8000 Indian Weights,' by Thomas; 'Coins of the Urtuk Turkmans,' by Poole; 'Campaigns of Lydia and Persia,' by Head; 'Coins of the T'uluni Dynasty,' by Rogers; 'Parthian Coinage,' by Gardner; and 'Coins and Measures of Ceylon,' by Rhys Williams. While the authors included some of the most important numismatists of the day, it is clear that this collected volume saw little circulation beyond the 17 'subscribers' listed on the title page.

Istanbuler Forschungen, Band 29. An impressive work. Clain-Stefanelli 4514*. Kroh 64 (five stars): "This is an incredible study that traces the sharing of obverse dies between various cities in Asia Minor coming to the conclusion that there were central workshops that engraved and struck coins for various cities instead of individual mints in each. ... The plates are so crisp and clear that each detail on even the most heavily worn coins stands out boldly. This is a most spectacular work that can ably serve as a basis for further study."

*An intriguing volume including some rare and notable publications. While the *Numismatic Chronicle* offprints are occasionally encountered, Sainthill's *Defence of the British School of Medal Engravings* is a rare publication, as is Smith's *Catalogue of the Tradesmen's Tokens Current in Ireland between the Years 1637 and 1679*. These two 19th-century Irish numismatic publications are very infrequently offered and are quite interesting.*

Two volumes. 4to, original matching gray printed card covers, xii, (2), 290; (4) pages, 4 plates of monograms, 202 fine plates of coins. Fine. (300.00) An exceptional collection of Greek coins, superbly illustrated. The first, most important, and difficult to obtain of the seventeen Ars Classica sales featuring

ancient coins. Beautifully illustrated and meticulously catalogued by Dr. Jacob Hirsch, the Ars Classica catalogues comprise one of the most important series of auction sales of choice ancient Greek and Roman coins ever issued, and they remain indispensable in establishing and tracing pedigrees. Unfortunately, the paper on which this first sale was printed was very poor, making it common to find copies with nice plates but with brittle, browned pages. This copy addresses this by combining the fine pages of a later reprint with the much superior original plates, which have few peers for the period. Clain-Stefanelli 1988*. Grierson page 286: "Une des plus belles collection. Le catalogue, avec 101 planches, est habituellement employé comme ouvrage de référence." Kroh 11 (four stars). Spring 471 (which includes a colorful account of Pozzi's even more colorful life). The Boutin production is a reconstruction of the European portion of the Pozzi collection (including coins not sold in the Ars Classica sale). Clain-Stefanelli 1932*.

An exceptional collection, though comprising a relatively small portion of Montagu's magnificent numismatic holdings. A remarkably accomplished British numismatist. Montagu came late to the series, purchasing his first ancient Greek coin in 1889. In 1893, he acquired the entire stock of the Paris dealer, M. Hoffmann, and from then to the time of sale, his holdings rapidly multiplied. The preface notes that "Since the dispersion of the Northwick cabinet in 1859, no collection of Greek coins so remarkable for their beauty, condition and numismatic importance, as that formed by Mr. Montagu has been offered by public auction in this country." Daehn 1367. Grierson 285. Spring 765 and 766.

A bit of a mystery, as it apparently never occurred to the collector who spent untold hours assembling this Sotheby to go to the trouble of signing it. The volume brings together ten notable Sotheby's catalogues of ancient Greek coins (or the Greek sections of more comprehensive catalogues), and combines them with the known collector's indices, maps, table of the Greek alphabet and other notes. Most interesting and could respond well to further research.

*A Handsome, 17th-Century Copy
of John Dryden's Works of Virgil*

1294 [Virgil]. Dryden, (John) [translator]. THE WORKS OF VIRGIL: CONTAINING HIS PASTORALS, GEORGICS, AND ÆNEIS. Second edition. London: Printed for Jacob Tonson, 1698. Folio, antique quarter calf; raised spine bands, decorated in blind; red morocco label, gilt; marbled paper sides. Superbly engraved sculptural frontispiece; title printed in red and black; 690 pages; 101 finely engraved plates. Title a trifle soiled; moderate browning; a few minor wormholes at the end in the bottom margins. Very good. (500.00)

A quite acceptable example of this handsomely produced work. On pages 39–42 are found "The Names of the Subscribers to the Cuts of Virgil, Each Subscription being Five Guineas" and "The Names of the second Subscribers." The engraved name of each subscriber and their coat of arms is found at the base of each of the 101 plates. Publisher Jacob Tonson thus offered an immense sum of £605, presumably to help defray the costs of producing the magnificent plates, signed by some of the finest designers and engravers of the seventeenth century. Unbeknownst to the sales offer, however, these plates had originally appeared in John Ogilby's 1654 Virgil, and those "The costs involved had been paid long before the present work had been published." Father Michael F. Suarez, in "Engraved Book Illustrations and Their Patterns in Seventeenth- and Eighteenth-Century England," in *The Library & Clark Newsletters* (CLAA Center for 17th- & 18th Century Studies, Vol. 20, No. 4, 2008), Number 51, Spring 2010, pp. 90–92, finds "longitudinal motifs like the Virgil's Multiplicity of God fathers" in his *A July & a July (1704)*. He further notes that, "On certain plates the publisher depicted himself as appearing in the foregrounds, making them the portraits of contemporary English Court society."
